

Starry Night in the planetarium reinvents astronomy and space science education. From basic sky observations to exploring distant galaxies, these programs bring scientific accuracy and realistic detail together in an immersive experience.

Planetarium Programs

Day and Night

Make observations about the world around you and explore the differences and similarities between day and night.

Motion in the Sky

How does light relate to the position of a shadow? Explore the relationship between the movement of celestial bodies and the sun.

Solar System

Investigate our Sun and planets in a demonstration of planetary movement.

Our Night Sky

Our view of the sky changes throughout the year. Find animals, heros, machines, and more in the stars while exploring the the night sky.

Fulldome Feature Films

Earth, Moon, and Sun

Explore the relationship between Earth, Moon, and Sun with the help of Coyote, an amusing character adapted from Native American oral traditions.

*NOTE: Full program standards and descriptions available upon request.
SciDome programs are designed for 20 - 60 students and last 45 minutes.
